

INNOVATIVE IMPROVEMENT OF THE EDUCATION SYSTEM IN THE FIELD OF PHYSICAL EDUCATION AND SPORTS

Yormatov Gulomjon
Lecturer of the Department of Exact and Natural Sciences of the
Correspondence Department of Fergana State University

***Abstract:** Today teachers innovative business skills, qualifications, it is important that they should be able to. Innovation business skills by teachers, with the skills to be able to feed their innovative approach taking performance are required. Innovative business skills in a nutshell by their teachers, they find innovative approach based on the decision in the development of skills associated with the night. Also find innovative approach in the decision of teachers in the process of problem beithern if it goes in several stages.*

***Key words:** sports, education, innovation, innovative activity, physical education, physical culture.*

Currently various sectors that are linked to the development of science in physical education have entered. The attitude of this population in our society, only of physical education and sports physical training and sports of the training process involved in making and studying them through the building might not be achieved through the improvement of facilities or sports shows. Therefore, the role of all factors in the development of physical education and sports of the study of the effects is important. In this regard, the development action strategy of the republic of Uzbekistan on the basis of physical education and sports modern trends of development of theory and methodology of sports training in innovative technologies, adaptive scientific and methodological aspects of sport and physical education, physical culture and sports of medical-biological problems of physical culture and sport of socio-cultural and psychological problems, to prepare qualified specialists in the field of physical culture and sports is a result of their focus to modern problems.

The care of the person to deliver comprehensive education in the context of globalization, which is specific to perfection and plays an important role in the formation of the quality of qualified professionals. Quick period of education in today's recipient, also in the short term and readers, including-based armed with information on them to create the necessary conditions to be a thorough master of the basics of various subjects by the buyer.

The opportunities of the educational process in modern conditions the development of the person than reflect all real, and which socialization independent, critical and creative thinking abilities are required to be trained. Education refers to education that is directed at the person, which will show you these possibilities.

Activities in the education system or educational use as possible to get the highest results from funding and innovation spent in power is the ultimate goal. Innovations from any news of the difference, allowing you to manage and control it is necessary to have a mechanism for changing it. In education as in all areas, " Innovations ", "innovative" and referred to them on the activities of representing the essence of the word.

The process of innovation and commercialization relatively new small business who is familiar with the type of this state in the country to encourage the innovation process represents an opportunity

to show the effects of actual management necessary. The high consumption of new knowledge and the application of such impressive one of the tools that are capable to become a product that have value effective innovation policy focused on the creation of the state of the national innovation system to develop. Much to the development of the national economy at the intellectual level of such activities with a focus on innovative results offer will determine the importance rationalization.

The most popular items is Rationalization of creativity technical proposals. With their help, the decision shall be made for the improvement of the already known technical force them to adapt to conditions in specific production equipment is updated and carried out, curators and the elimination of mistakes that let objects ago

The science of Uzbekistan who can adapt quickly to changing needs of today's market, the requirements for knowledge that are in high demand in the whole world and our country, high-tech products(services)to show in the literal sense of the creation of directed technological innovation is aimed at the base of the economy. Modernization of modern science and technologies physical culture and sports of the republic of Uzbekistan in the development of the third sector is considered one of the priority tasks that must be addressed. One of the important aspects of modern education specific to teachers to achieve professional character of innovative activities is considered. The issue of professional pedagogical innovation activities in developed foreign countries to achieve the character from the last century started 60 years of serious study. In Particular, ChinaBarnet, J.Asset Bass, D.Gamilton, N.Gross, R.Karlson, M. Maylz, A.Xeyvlok, D.Chen, R.Eden, F.N. Gonobolin, S.M. God, V.I.Zagvyazinskiy V.A.Kan-We Have Kali, N.V.And v. KuzminaA.Slastenin in the works by researchers as innovative activity, innovative teaching career the approach, innovative ideas and to implement them effectively into practice on the basis of, and from foreign countries in the republic of pedagogical activity, pedagogical innovations created through the message to know the contents of active use of them in practical action in the area of lit.

Introduced in a nutshell innovations relationship or process innovation is a dynamic system is considered. The process of relationship or insert the news as a system in itself, firstly, the internal logic, the second to the news introduced which indicates consistent development and the environment represents a certain time range interaction effect.

Enhancing physical education and sports was going on within the system requirements with innovative trends coming in scientific studies can be explained. The pace of today's modern development, and are becoming increasingly faster, with the coming together into various fields of physical education and sport in this system, strengthen cooperation in the development of physical culture and sports, has been identified. The general population of physical culture and sport in Uzbekistan, especially among young people and to promote the conditions necessary for healthy lifestyle infrastructure the creation of the country and to ensure appropriate participation in the international sports arena to be the appropriate place to himself the use of a wide range of the innovative achievements of science plays an important role. Such a responsible task to complete while in the perfect level of training of national science and are giving great importance to the development of the system in a dynamic way.

Physical education and sports in the field of scientific and scientific-pedagogical education is based on innovative strategies to address issues that are related to each other:

- clear goals and strategic assignments and convert to assume the task than you know;
- development of a strategy to achieve goals and objectives;
