Abstract: In the Republic of Uzbekistan, much attention is paid to reforming the education and training system, as well as raising it to the level of developed countries, as a priority of state policy. Today, everyone knows that the system of continuous education and training has become a decisive and important factor in the innovative development of any country in accordance with the requirements of the time. Modern scientific and technological development requires the introduction of innovative technologies not only in many industries, but also in the field of cultural, social and humanitarian knowledge, education.

Keywords: technological development, economics, science, technology and innovative technologies.

Introduction

It is known that in the "National Program for Personnel Training" "... providing the educational process with advanced pedagogical technologies" was emphasized and defined as one of the serious tasks to be solved at the stages of continuous improvement and improvement of the quality of education. In this sense, in the development of the independent Republic of Uzbekistan, to create an excellent education system based on the rich spiritual potential of the people and universal values, the latest achievements of modern culture, economics, science, technology and innovative technologies, as well as theoretical and methodological foundations of domestic pedagogy and innovative pedagogical technologies and the need to implement the need to reform the national education system, bring its potential to the world level, create an educational market and train competitive specialists.

Materials and methods

In the Resolution of the President of the Republic of Uzbekistan "On measures for the further development of the higher education system": "Each higher education institution should establish close partnerships with leading scientific and educational institutions of the world, use advanced pedagogical technologies, educational programs and training programs based on international educational standards in the educational process, actively involve highly qualified teachers and scientists from foreign partner educational institutions in educational and pedagogical activities, conduct master classes, training courses ... The main driving force in solving these fundamental problems, determining the success of the national and spiritual and educational development of the Republic of Uzbekistan, is the introduction of innovative pedagogical technologies. In this case, we will have to abandon authoritarian pedagogy and adopt innovative technologies. Currently, the main goal and content of education in Uzbekistan have been radically updated. Therefore, in the Republic of Uzbekistan, special attention is paid to the effective implementation of innovative technologies in higher and secondary specialized educational institutions. The competence of a teacher in managing innovative educational technologies in universities, this set of interrelated requirements should be able to represent a generalized model and the main requirements of a teacher.

The need to create an excellent education system based on spiritual potential and universal values and the latest achievements of modern culture, economics, science, technology and innovative technologies, as well as the need to create and implement a national education system based on the theoretical and methodological foundations of domestic pedagogy and innovative pedagogical technologies must be reformed, its potential must be brought to the world level, an educational market must be created and competitive specialists must be trained. In the Resolution of the President of the Republic of Uzbekistan "On measures for the further development of the higher education system": "Each higher education institution must establish close partnerships with leading scientific and educational institutions of the world, use advanced pedagogical technologies, educational programs and training programs based on international educational standards in the educational process, actively involve highly qualified teachers and scientists from foreign partner educational institutions in educational and pedagogical activities, conduct master classes, training courses ... The main driving force for solving these fundamental problems, which determines the success of the national and spiritual and educational development of the Republic of Uzbekistan, is the introduction of innovative pedagogical technologies. In this case, we will have to abandon authoritarian pedagogy and adopt innovative technologies. Currently, the main goal and content of education in Uzbekistan have been radically updated. Therefore, in the Republic of Uzbekistan, special attention is paid to the effective implementation of innovative technologies in higher and secondary specialized educational institutions. The teacher's competence in managing innovative educational technologies in universities, this set of interrelated requirements should be able to represent a generalized model and the main requirements of a teacher.

- The teacher must have teaching skills, the ability to educate, the ability to objectively assess and control students' knowledge;
- He must be able to use innovative pedagogical technologies in organizing the educational process;

Conclusion
